THERE isn't any home comfort that compares with good lighting. And because it is necessary is no reason why it should not also be convenient.

Westinghouse has developed a light and power plant that brings good lighting to the farmer who is far from the electric power plant in the city. This small and compact unit is so simple in design that anyone can operate it.

And yet, it lights the farm buildings and furnishes the power of a hundred hands, in helping the farmer and his wife in their daily work, better than many larger and more complicated isolated electrical units do.

The farmer who installs a Westinghouse Light and Power Plant assures himself and his family of comfort and convenience. You will be interested to learn more about it. Let us give you the particulars in person.
